

Sustainable Energy Awareness Forum

for Professional Advisers, Property Owners and Managers

**March 17th, 29th April & 26th May
from 9.30 to 16.00**

The Centre of Renewable Energy, East Drayton, Notts. DN22 0LG

If sustainable energy systems have a key role in moving to the low carbon economy, what technologies are available to be installed now? How do they work? What are the costs and benefits? Can they be relied upon for durable service?

The Sustainable Energy Awareness Forum provides the opportunity to explore the main technologies with presentations from industry specialists supported by performance data, financial illustrations and a tour of installed systems.

Wind Turbine, Solar PV, Solar Heating, District and Local Biomass Heating, Biomass Production, Building Energy Monitoring, Heat Pumps and Rainwater Harvesting are demonstrated. Information on FIT's, RHI included. Presentations are generic to the technology and use case study examples.
